

Ansamblu de radiator ceramic infrarosu

INFO

Tip/Type PUBSUN

Nr. / No.
PUBSUN

PUBSUN

Descriere:

PUBSUN este un sistem de incalzire sigur, simplu si accesibil, atat in afara cat si in interior, care va permite sa furnizeze caldura si confort simplu si eficient.

Beneficii oferite de PUBSUN:

- Tehnologia PUBSUN este aproape 100% eficient si ecologic
- Elementele ceramice de incalzire cu infrarosu nu produc fum, mirosuri sau apa spre deosebire de alte incalzitoare.
- Incalzitoarele PUBSUN au un cost redus, durata ciclului de viata fiind de 10.000 de ore.
- Sunt usor de instalat, extrem de sigur si convenabil.
- PUBSUN nu necesita intretinere periodica in scopul mentinerii eficientei, doar o stergere de praf de pe carcasa exterioara in timp ce este oprit si racit complet.
- Incalzeste in cateva minute fara lumina rosie incomoda
- Produce lungimi de unda in infrarosu, similare cu cele ale soarelui dar fara efectele ultraviolete daunatoare.

Domenii de utilizare:

In exterior:

- Ecologic, superior incalzitoarelor cu gaze
- Functionarea elementelor PUBSUN sunt cu pana la 90% mai ieftine decat cele a incalzitoarelor cu gaze
- Cu un rating de IPX4, PUBSUN poate fi folosit in exterior, cu conditia sa fie instalat sub un acoperis adecvat.

In interior:

- Incalzirea cu infrarosu nu incalzeste aerul, el incalzeste locatia sau persoana
- Prin inlocuirea sistemelor traditionale de incalzire cu sisteme PUBSUN puteti reduce semnificativ factura la incalzire.
- Deoarece elementele PUBSUN nu au suflante de aer, nu perturba praful si particulele, fiind complet silentioase sunt excelent utilizabile in locurile in care praful este un motiv de ingrijorare cum ar fi prepararea produselor alimentare, cabine de vopsire etc.
- Incalzitoarele PUBSUN sunt durabile si spre deosebire de becurile de sticla, acestea nu se vor sparge sau exploda, adecvate pentru utilizarea in domenii cum ar fi prelucrarea produselor alimentare.

Ceramic infrared heating ensemble

INFO

Description:

The PUBSUN is a safe, simple and affordable outside & inside heating system that allows you to provide warmth and comfort simply and effectively.

PUBSUN Benefits:

- The PUBSUN ceramic infrared technology is nearly 100% efficient and environmentally friendly.
- Ceramic infrared heating does not produce fumes, odors or water unlike other heaters.
- PUBSUN ceramic infrared heaters have a low lifecycle cost, providing 10,000 hours of comfort heat and have a 2 year guarantee.
- Easy installation, extremely safe and convenient.
- PUBSUN does not require regular servicing to maintain efficiency, only a dusting of the exterior housing while the PUBSUN is switched off and completely cooled.
- Warms up in minutes with no uncomfortable red glare.
- The output of longwave infrared heaters has similar wavelengths to the sun with none of the detrimental ultraviolet (UV) effects.

Fields of use:

Outdoors:

- Environmentally superior to gas patio heaters.
- PUBSUN units are up to 90% cheaper to run than patio gas heaters.
- With an IPX4 rating, the PUBSUN can be used outdoors provided it is installed under a suitable cover.

Indoors:

- Infrared heating doesn't heat the air, it heats the location or person.
- By replacing inefficient traditional warm air heating systems with ceramic electric heaters, you can significantly reduce heating bills while still maintaining a comfortable environment.
- Since PUBSUN heaters do not have fans they don't disturb dust and airborne particles and are completely silent; excellent for use in places where dust is a concern such as food preparation, paint booths and more.
- PUBSUN infrared heaters are durable, and unlike glass bulbs, will not shatter or explode. Suitable for use in areas such as food processing.
